CTLS 2020 CONFERENCE

The **Instituto Gulbenkian de Ciência** is proud to organize the **4th European Core Technologies for Life Sciences conference – CTLS2021**.

CTLS2021 aims to bring together in a stimulating environment scientists, technicians, leaders from Core Technology Facilities and Resource Labs from all fields of Life Science, who are eager to share experience and know-how. This year, because of Covid-19 pandemics, **CTLS2021 will be online**.

CTLS2021 is organized as a multifaceted conference, offering plenary sessions with satellite meetings and workshops, fostering interactions and **collaborations between the scientific community and the industry**.

CTLS2021 is expected to attract more than 300 participants from all fields of Life Sciences following on the success of previous editions at Institut Pasteur, Paris in 2014, at EMBL, Heidelberg in 2016 and at VIB, Ghent in 2018.

As in previous CTLS conferences, we will gather professionals from important specialties in life science research technologies such as microscopy, genomics, mass spectrometry, cell sorting, protein production and purification, structural biology, and molecular biophysics. In addition to scientists, CTLS2021 will attract professionals involved in Scientific Core Facilities management.
